***REASON FOR ALLOWANCE***

***Allowable Subject Matter***

Claims 1-7, 10-16, 18-25 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record teaches master and slave modules connected to each other through a switch and various signals/links; except that the master and slave switch wireless modules are included in a master and slave switch; and the master module is inserted into a prohibited list after the link has been established.

Murayama is an exemplary reference that closely approximates the applicant's invention.

Murayama discloses that the master and slave modules are linked together through a switch. However Murayama does not disclose that the master and slave switch wireless modules are included in the switch; and the master module is inserted in a prohibited list after the link has been established. With regard to the first embodiment, Murayama therefore, fails to disclose a wireless bridging between networks with these components.
